

**INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS
LOCAL UNION 614**

Lawrence Anastasi | *President · Business Manager*

Dear 614 Brothers & Sisters:

As a member of Local 614, you may have been exposed to asbestos. Exposure to asbestos can occur in the workplace, when performing side jobs outside of work, when working on your cars and trucks and even through exposure to the work clothes of your spouse or parents.

As a utility, exposure to asbestos may occur while with gaskets and packing used in equipment such as valves and pumps, around asbestos insulation on worksites as well as other asbestos products, possibly without you recognizing that these products did in fact contain asbestos. Also, working around other tradesmen who used asbestos containing products can also cause harmful exposure.

Asbestos can cause cancer which takes from 10 to more than 50 years to develop after your first exposure. A chest x-ray or CT scan can determine whether you have suffered an asbestos-related injury.

If you or a family member are currently suffering or have died from mesothelioma or lung cancer, even if you or your loved one smoked, you may be entitled to compensation.

It is important to know that there are time limitations within which one must file a lawsuit for asbestos-related injuries and a loved one's death or be forever barred. Therefore, if you or someone close to you has been diagnosed with or died from asbestos-related disease, please contact Eric Pearson or Jon Koutcher of Pearson Koutcher:

Eric: 484-368-7857 | eric@mywclawyer.com

Jon: 484-368-7859 | jon@mywclawyer.com

If you have any further questions, please feel free to contact them.

In solidarity,

Lawrence Anastasi
